Employee Locker Room Solutions

Digilock
employee locker locks

Digilock KTE is a shared use locking solution allowing employee lockers to be shared by multiple shifts and therefore reducing the number of lockers and real estate required for the lockers while providing a means to easily audit any locker in the locker room.

With Digilock KTE assigning lockers and/or having employees provide their own lock is eliminated. Digilock minimizes the amount of employee time required to manage the employee locker room as there are no keys to manage. Lockers that are locked and abandoned will automatically become available after 12 hours of non-usage.

Employees lock and unlock any available locker with a self selected four-digit code. When locked, the LED flashes to indicate that the locker is in use. When unlocked, Digilock KTE will remain unlocked until locked by another user. Management access is provided with the use of an electronic Manager Bypass Key without disturbing the user code.

LOSS PREVENTION
▶ Provides the ability to audit all lockers by use of the electronic Manager Bypass Key.

SHARED USAGE
▶ Reduces number of lockers in the locker room and required real estate for lockers by providing a shared usage solution.

▶ When a lock is unlocked, it is considered available and can be locked with any four-digit code by any employee.

▶ Locker automatically unlocks after 12 hours of non-operation preventing a user from taking over the locker after their shift.

ADA COMPLIANT
▶ Digilock KTE meets the US Access Board's requirements for ADA compliancy with the use of the ADA User Key. Employees with disabilities are issued an ADA User Key that will allow them to lock any available locker without tight grasping, tight pinching or twisting of the wrist to operate.

MANAGER BYPASS KEY

ADA USER KEY

EMPLOYEE THEFT
▶ Helps deter employee theft as lockers can be audited at any time without disturbing the user code.

EASY TO INSTALL
▶ Digilock is easy to install on new or existing lockers utilizing the existing mounting holes.

DURABLE
▶ Digilock KTE is a time–tested product with installations in hundreds of retail establishments.

▶ All metal construction and backed by a two–year warranty.

ROI
▶ With a battery life of five years or more, Digilock is a low cost solution that quickly pays for itself within the first few months of usage. It eliminates lost keys, unavailable lockers, bolt cutters and most importantly–the waste of management time.
